

Name:Krishna Shukla
Roll No.:2022254
IHCI Group No.:13

Example 1

Answer 1>>>> This is the dustbin in Indian railway.

Answer 2>>>> This is an example of bad design as it is less frequently used. It has a problem with usability and simplicity.

Answer 3>>> It is less frequently used as it is at a very hidden place, and for 72 people, they provide one dustbin, so for people to walk inside the train and throw something in the dustbin seems not a good choice. Also, you have to touch the dustbin while using it.

Example 2

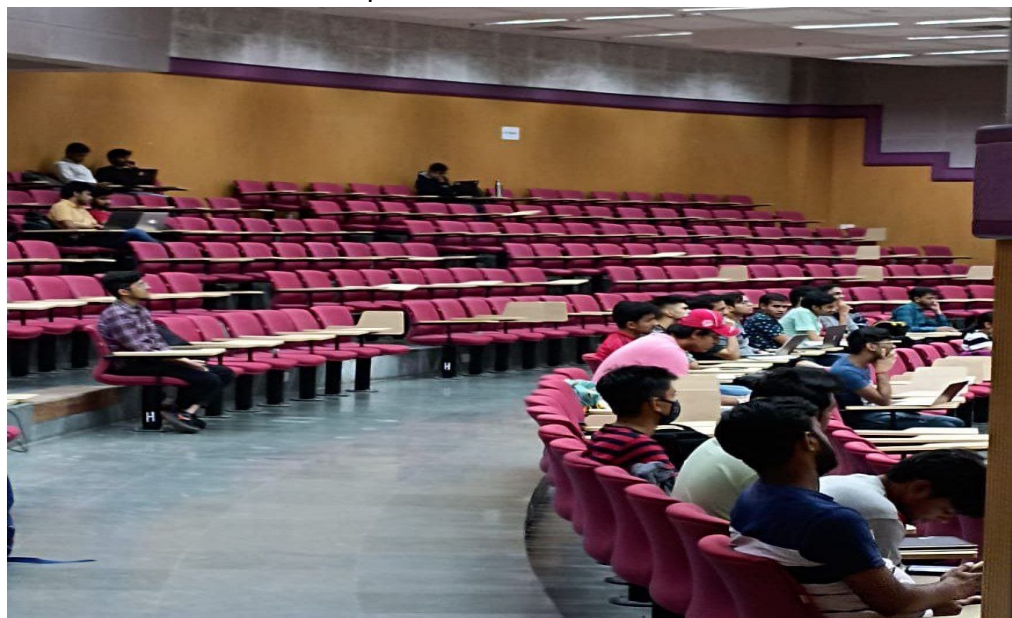

Answer 1>>> This is a car which is standing for a long time in the sun.

Answer 2>>> This is an example of bad design, as in summer, the inside of the car gets overheated, and it feels suffocating inside. It is a lousy design due to usability.

Answer 3>>>> This is a bad design as the car should be made of a material that is not that heat-absorbing in nature; instead, we could also have a cheap coating on the surface of the car which does not absorb heat.

Example - 3

Answer 1>>>>This type of design is found in c102 in the lecture hall complex where our IHCI class takes place.

Answer 2>>>>This is a lousy design due to the usability point of view.

Answer 3>>>>This design does not fit left-handed students; also, it provides less space to carry things; we should instead have seats as the nearby class is C102.

Example - 4

Answer 1>>>>This type of product is found primarily on every teenager's regular use.

Answer 2>>>> This is a good design from all three aspects of design usability, accessibility, and simplicity.

Answer 3>>>>These earpods do not cost a lot; also, they are not heavy like headphones. Also, they are wireless compared to the wired earphone and also have the excellent battery life.

Example-5

Answer 1>>>>This can be found in homes, offices, institutions, and obviously in the furniture shop.

Answer 2>>>>This design is suitable for usability and accessibility view.

Answer 3>>>>A bean bag is not so expensive and could be used as furniture, a bed for pets watching movies and relaxing. It is also eco-friendly.

Example - 6

Answer 1>>>> This is a picture of earth taken from the open-source website.

Answer 2>>>>It is a perfect design as it has been alive for billions of years.

Answer 3>>>>The earth has a precise amount of water and land; it revolves in orbit with a suitable speed; also, its atmosphere has an appropriate amount of gases. All the things on it are in such a way that it can sustain itself for billions of years, and humans on it too.
